

Palma

Cold Drinks

COFFETEK
LIMITED

The compact refreshment solution which can go through a standard doorway

At just 724 mm wide - Palma Cold Drink is a compact refreshment solution which can go through a standard doorway. The footprint makes it easier to manoeuvre and easier to install.

Capacity is increased to 7 products per selection (600ml = 6), with a typical number of selections of 24 and a total capacity of 168 products.

Belt delivery system

The machine incorporates an advanced Belt delivery System, replacing the traditional spiral type delivery technology. The flexible belt system enables the dispense of cartons, cans and bottles with no need to change anything on the machine.

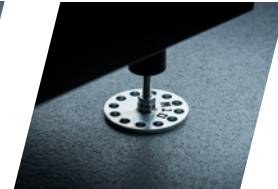

Merchandising

Merchandising is enhanced on the Palma Cold Drink as the product is always displayed face on. Planogram compliance is also improved as each selection can be branded on the delivery gate and product pusher, ensuring that even when a product is sold out the machine always looks full.

Extra secure

Coffetek merchandising systems are prepared to prevent theft and vandalism. The intelligent product closure system and the robust door have been developed to avoid any unwanted access to the machine. The optional security feet are available to secure the machine to the floor.
