NEO RANGE FROM COFFETEK

NEO

Why Select Coffetek?

Coffetek has more than 30 years experience in the design and manufacture of beverage dispense systems. Our products have been successfully exported throughout Europe and as far afield as the Far East and Australasia. In the UK we have built an enviable reputation for equipment simplicity and reliability achieved through exploiting our experience in product design and innovation. Coffetek is a member of the Azkoyen Group of companies, with origins dating back to 1945 Azkoyen specialise in the design and manufacture of a complete range of merchandising systems. With this combined expertise & resource we are able to offer one of the most comprehensive refreshment solutions in the world.

Cool Mono Iconic Warm Espresso

Neo Hot Beverage Machine

Neo from Coffetek brings the coffee shop directly to you, serving a delicious range of high quality hot & cold* beverages. Finished in ebony gloss the angular design provides a stunning look which will compliment any environment.

The patented in-touch selection system incorporates large icon buttons which are akin to many consumer electronic devices, making drink selection simple and quick.

The wallpaper graphic system with LED backlighting allows the machine to be transformed for different environments. There are three standard wallpapers to choose – warm espresso, cool mono or Iconic. The panel can also be customised.

NEO is available in five different specifications (instant, single fresh brew tea, double fresh brew, triple fresh brew and bean to cup). The varied menu includes continental coffee blends directly from the bean, fresh leaf teas, the finest freeze dried coffees and indulgent hot chocolate drinks. Using the in-touch system the consumer can fully customise the drink, altering the amount of milk / sugar and varying the strength of tea or coffee.

The consumer experience is further enhanced with a large open serving area which is LED backlit*, displaying the drink when it is prepared.

Once perfected the selection process can be enhanced by using the Neo Quick Code facility. This provides the user with a unique code for their optimum beverage which can be entered using the quick code function.

In-Touch User Interface

Incorporating patented technology the selection system on the Neo range provides a simple icon driven user interface, making it simple to select the required drink - touch & go.

- **Easybrew® technology** – providing perfect coffee and fresh leaf tea
- **Wallpaper graphic system** – transform NEO with a range of wallpapers to compliment any environment
- **I-Detect system** – The I-Detect system ensures that a cup is dispensed every time or your money back! I-Detect also allows you to place your own cup which is automatically detected
- **Large open LED lit* serving area** – Enhances the user experience providing full view of your perfect beverage with LED lighting
- **Jug facility** – Provides freshly prepared coffee and tea for those all-important meetings
- **Cup choice** – Neo is available to dispense different cup types and sizes, plastic, paper and even 12oz take away style paper cups
- **Text Alert** – simple system to allow real time reporting of machine issues, reducing down time and improving the customer experience
- **Payment solutions** – Neo is equipped to support various payment technologies including coins and cashless

Neo Environmental Benefits

The Neo beverage machine incorporates the most advanced energy saving mode available, saving up to 30% in energy consumption.

Most systems rely on the machine having a specific time period set to enter a shutdown or economy mode. The Neo has inbuilt learning technology which monitors usage and automatically alters the shutdown or economy mode time periods.

- **Energy Learn®** Uses the selection system to detect usage
- **Energy I-Detect®** An advanced movement sensor detects a user on approach to the machine

• First machine manufacturer to have machine independently tested to the EVA-EMP standard;

- Consumes just 86 watt hours / hr
- 90% of the Neo hot beverage machine is recyclable at the end of life
- Paperless brewing system, no paper waste
- Cup sensor allows use of own cup reducing plastic and paper cup usage

Neo Snack & Drinks Machines
