CASIA LOCKERS

The technology that
revolutionize the
storage management
of PPEs and other
consumables.

How Casia Lockers work?

Casia Lockers can distribute inventory at the point when its needed, quickly and efficiently. Automation process may be implemented and improve overall business management.

Casia Lockers are an innovative storage system with **full management reporting** capabilities for advanced **24/7 manageable access, end-to-end tracking of usage**, new more efficient business processes, **Click & Collect**, loan and return of items such as PPEs, IT assets, consumables, stationery etc. with full **accountability** and visibility of ownership, and **governance of valuable inventory**.

A **modular** and **versatile** structure which is controlled from a master unit and further built-up with vertical compartments of solid or glass door to create a final customised solution. Casia Lockers offers **optimum capacity at a small footprint** and powerful control of up to 8 satellite structures of compartments.

BENEFITS

How the CASIA
Lockers may help
your business?

¿Qué ventajas me aporta Casia Lockers?

ACCOUNTABILITY AND CONTROL

- Identify each user gaining visibility and management over the business inventory from a multichannel web access to the information.

SAVINGS

- Identify the users in order to improve the use and consumption of the offered items.
- Reduce unproductive walking time from place to place to collect items

GREATER EFFICIENCY.

- Time-consuming tasks are now under control. Reduce time and costs on inventory
- Database update and management facility
- Touch screen interface for more information about its item, including use instructions or other important data associated to the item to be used.
- Available application to book online items from an online catalogue or shop.

REPORTING AND ACCOUNTABILITY TRACKING

- Real time reports for stock control and status alerts of the system
- Option to integrate the complete telemetry data to the corporate ERP

TRACEABILITY

- Reliability when delivering PPEs (PRL). The system allows to identify who collected, what and how many.
